</table>

**BACKGROUND:**
MAG has recently undergone a 30-day comment period for the Regional Transportation Plan (RTP) and the Air Quality Conformity documentation. It was presented to TAC in May and Regional Planning in June and was authorized for the comment period and barring any comments that would cause an issue with Air Quality Conformity it was to be adopted. Therefore, it has been determined to be adopted and FHWA has issued a finding of Conformity for MAG.

To report on the public comments received, MAG received 105 comments over the comment period and the comments were predominately regarding two projects in Provo. They were the proposed widening of 2230 North or project 37 in the RTP and also project 38 or the widening of 820 North in Provo. Both projects are in Provo City's transportation master plan and approved by the Provo City Council and Administration.

**STAFF RECOMMENDATION:**
N/A

**SUGGESTED MOTION:**
None. This is informational only
